Warehouse is a commercial space for the storage of goods in large quantity. When bulks of goods are stored in a place there is a chance for infestation and loss of goods. City tarpaulins produce wide range of products to meet the needs of warehouse protection and security, especially from wind, dust, rain infestation and other external interference. We have customised PVC coated tarpaulins from small size to extra large size as per the need of customers. As our products are 100 % water proof and fungus resistant customers can always put their trust in our products.
